Mohit Choudhary

Steps followed to make annotation file –

1. Open QGIS.
2. To add Tiff File, drag Tiff file from File Manager to QGIS Interface.

3. To remove the black background in tiff file -
   a. First select the Identify Feature (“Ctrl + Shift+ I” OR “i shape icon on Project Toolbar”) then go to black background and note down the value.
   b. Go to Raster Properties -> Transparency -> Transparent pixel list-> Add values manually from + icon -> type values identify from Identify feature previously.

4. Project -> New Print Layout -> give name of layout and create it.

5. New window will open.

6. To add Map,
   Select Add Item -> Add Map -> Select blank space using mouse.

7. For adding zoomed map,
   Again Add Item -> Add Map -> Select small rectangle.

8. Click Move Item Content (Hand Icon)
   a. Click inside the small map.
   b. Zoom in using the mouse wheel.
   c. Pan to the crater.
   d. Only this map changes.
   e. The large map remains unchanged.

9. To draw a rectangle around the zoom area,
   Select main map -> Item properties -> overviews -> click + -> Add map 2

10. To add Latitude and Longitude –
    Select map -> item properties -> grids -> + -> Set CRS to Moon Geographic -> Set Interval (x to 12 & y to 1) -> Enable draw coordinate -> Set Format as Degree, Minute with suffix.

11. To set frame-
    Item properties -> grids -> + -> grid 1 -> frame -> (frame style=> line border (nautical))

12. To remove grid line –
    Item properties -> grids -> + -> grid 1 -> appearance -> (grid type => frame and annotations only)

13. Item properties -> grids -> + -> grid 1 -> appearance -> set interval according to the map(I have taken x as 20 and y as 2)

14. Item properties -> grids -> + -> grid 1 -> Draw coordinate
    ➔ Disable Right and top -> set Show latitude/ Y only in Left -> set Show longitude/ X only in bottom

15. To add arrow to connect the maps-
    Add item -> Add arrow

16. To add north arrow –
    Add item -> Add North Arrow

17. To add Legend –

Add item -> Add Legend

18. To add scale bar –
Add item -> Add Scale Bar

19. To save project-
Layout –> Save project -> Specify location and save it

20. To Export as image-
Layout -> Export as image -> Specify location and save it
